# Paper Plate Letters

Instructions: Print letter circles on regular paper ... cut out and glue in the center of paper plates. You can do a letter sequence by having the children put the paper plates in alphabetical order ... you can then do a sequence match by putting a second set of paper plate letters on top of the matching letters. You can make a list of sight words or spelling words and then children would then use the paper plate letters to make those sight words. You can also have children spell their names. Use your imagination and have fun. We used the smallest paper plates available.
